COMMUNITY INTEGRATED Health Services

Trueblood *Mental Health Diversion*

Serving Cowlitz, Grays Harbor,
Lewis, Pacific
and
Wahkiakum Counties

What We Do?

The Trueblood Mental Health Diversion Program works with participants living with mental health issues by assisting them to navigate a path out of incarceration.

The Trueblood Diversion Team will engage and assess participants pre-release and post-conviction to establish wrap-around services and assist them in setting up basic needs services. We will continue to guide and assist participants post release by supporting them to meet court requirements and develop healthy practices to utilize over their 6-20 month program.

The focus is for participants to integrate back into society and move forward with their lives in their respective communities while gaining independence, wellness, and stability through following our program recommendations.

Benefits to Participant

- Dismissed or reduced charges
- Reduced risk of decompensation
- Facilitate and help cultivate positive relationships within the community and criminal justice system
- Culturally sensitive support
- Pre and post release peer support
- Assistance with community resource connections
- Individualized Coordinated Care Support Plan.
- Increased self worth and accomplishment
- Therapeutic and supportive monitoring
- Peers monitor client progress.
- Recovery focused care coordination
- Sense of connectedness, accountability, and independence

Benefits to Community

- Reduced fiscal liability to the county and community served
- Improved community safety and decreased crime rate
- Reduced incarcerated population

Goals

- Bridge the divide between criminal justice and behavioral health system
- Reduce recidivism rates
- Divert individuals from incarceration and in-patient hospitalization type setting
- Connect participants to services in the most efficient manner
- Provide a community support plan in the least restrictive environment
- Minimize harm to individuals by reducing long term incarceration and decrease involvement in the criminal justice system
